Likelihood	Severity of Risk	Calculated Risk	Action Plan
Improbable: 0%-5% Unlikely to happen	1 No risk to short-term or long-term health or sustaining personal injury	0 - 5	Low Risk. Safe to use under normal conditions
Remote: 5%-35% May occur at sometime	2 Remote risk to health or sustaining minor injuries treatable by site first aid	6 - 15	Safe to use with care, observing extra controls
Possible: 35%-65% Could occur at sometime	3 Low risk of personal injury requiring medical attention at A&E Department	16 - 20	Only under supervision
Probable: 65%-95% Very likely to occur	4 Moderate risk of personal injury resulting in more than 7 days off work	21 - 25	Do not use as the risk of injury is too high
Very probable: 95%-100% Almost certain	5 High risk of life-changing injury, long-term chronic illness, cancer & death
