Marisco recognises it is sensible to equip every worker it employs in the field with a fire extinguisher and/or a fire blanket if they work with gas, electric, or undertake any kind of hot-works (e.g. soldering pipes).

The purpose of this form is to allow staff to request a replacement extinguisher or fire blanket either because it has been used, or it needs to be replaced because the 'use-by' date has expired.

Should employment end, the employee must return the fire fighting equipment entered into his or her inventory.

It is the responsibility of each employee to look after the fire fighting equipment we provide and regularly check the expiry date has not passed.

By signing this request, you confirm you have received adequate training to use the fire fighting equipment provided and that you will ensure it is kept close by when you are working on site.
